

RAUL MANUEL AZAHARES REYES

Senior Backend / Full Stack | Python · .NET· Go · React

Havana, Cuba · araulmanuel@gmail.com

PROFESSIONAL SUMMARY

Senior Backend and Full Stack Engineer with 10+ years of experience building scalable applications across AI, healthcare, e-commerce, and enterprise platforms. Experienced with Go and Python services, RESTful APIs, PostgreSQL, Angular/React, distributed systems, CI/CD, secure integrations, clean architecture, and performance optimization. Delivers production-oriented LLM, RAG, multi-agent, and computer-vision solutions using specifications, tests, code review, and critical validation of AI-assisted output.

CORE SKILLS

Backend & APIs: Python, Go (Golang), FastAPI, Django, Flask, .NET, GraphQL, RESTful APIs, microservices | **Frontend:** React, Liquid, end-to-end integration | **Data & Cloud:** PostgreSQL, SQLAlchemy, DynamoDB, Firebase, Google Pub/Sub, Docker, cloud services | **AI Engineering:** OpenAI GPT-4/4o, Google Gemini, LangGraph, RAG, YOLOv8, LLM integrations | **Engineering Practices:** SDD, Git/GitHub, Pull Requests, unit/integration testing, CI/CD, structured logging, authentication/authorization, Agile/Scrum | **Languages:** Spanish (native), English (B2)

PROFESSIONAL EXPERIENCE

NTSPRINT | Senior Full Stack & AI Developer

Aug 2025–Present

Havana, Cuba | **Technologies:** Go, Python, .NET, Flask, PostgreSQL/SQLAlchemy, OpenAI GPT-4/4o Vision, RAG, YOLOv8

- Designed scalable Go and Python backend services and RESTful APIs for video processing, shot tracking, and AI model inference, with structured error handling and logging.
- Implemented a real-time computer-vision pipeline with custom-trained YOLOv8 models for basketball object detection at 640×640 inference resolution.
- Developed an intelligent coaching assistant using GPT-4, validating model output against application rules and test cases before delivering personalized feedback.

DCLICK-HELPIA | Full Stack & AI Developer

Feb 2025–Aug 2025

Havana, Cuba | **Technologies:** Go, Python, FastAPI, Django REST, React, GraphQL, Firebase, Google Pub/Sub, LangGraph

- Developed a multi-agent AI platform using LangGraph, GPT-4, Gemini, dynamic agent routing, tool binding, and retrieval-augmented generation.
- Designed scalable Go/Python AI microservices with asynchronous Google Pub/Sub processing, structured logging, and distributed conversation-state management.
- Implemented parallel multimodal retrieval, backend integrations, tests, and API documentation supporting real-time interactions across services.

AOSHIELD | Full Stack Developer

Jan 2024–Nov 2024

Havana, Cuba | **Technologies:** .NET, React, Shopify Liquid, CI/CD

- Built and maintained Katana and LifeLine healthcare-monitoring systems for Canadian users, contributing across backend, React interfaces, and end-to-end delivery.
- Implemented CI/CD practices that improved delivery efficiency and reduced deployment errors and lead time.
- Developed and configured Shopify storefronts and integrations using Liquid.

SOLDEV | Backend Developer

Jan 2021–May 2023

Havana, Cuba | **Technologies:** Python, Odoo, Django, Angular, PostgreSQL

- Developed WeekAway, an apartment-rental platform for the French market, using Python/Django, Angular, PostgreSQL, and RESTful APIs.
- Integrated external authentication and authorization systems and third-party APIs for secure, interoperable workflows.
- Developed custom Odoo modules and migrated legacy implementations to current Odoo Enterprise and Community editions.

EDUCATION

University of Computer Sciences | Computer Science Engineer | Havana, Cuba | May 2014
